Application area

- To fix roofing membrane to substructures made of sheet steel $\geq 0.75 \text{ mm} \leq 1.5 \text{ mm}$, timber or wood-based material
- For combination with EJOT® stress plates

Properties

- Case-hardened steel
- Climadur coated – high-quality coating to improve corrosion protection (15 Kesternich cycles, DIN 50018, 1997)
- With high thread to prevent screw head protrusion due to foot traffic

Technical specifications

Drilling capacity	1.5 mm
Drive	Hexagon A/F8

Length determination (min. lengths)

Sheet steel	Insulation thickness + 20 mm
Timber	Insulation thickness + 30 mm

Approval
ETA-07/0013

Cross reference

Stress plate HTV 82/40
Stress plate HTE 82/40
Stress plate HTV 82/40 F
Flat roof profile FP
Installation tool ECOset

Compatibility acc. to ETA-07/0013
